

VANSHIKA CHAUHAN

chauhanvanshika913@gmail.com | linkedin.com/in/vanshika-chauhan | github.com/VanshikaChauhan4 | **LeetCode: 250+ Problems Solved**

BCA undergraduate (GPA 8.8/10) who ships production-ready, AI-integrated web features rather than just tutorials — built and deployed LLM-powered UI at a university incubator, solved 200+ DSA problems on LeetCode, and shipped full-stack projects end-to-end (auth systems, REST APIs, AI tooling). Looking for an SDE role where I can own problems from day one.

TECHNICAL PROJECTS

AuthNode — [GitHub Repo ↗](#)

React.js · Node.js · Express.js · MongoDB Atlas · JWT

- Built a secure, production-style user identity system with JWT-based protected routing, bcrypt password hashing, and end-to-end token validation across the client and server.
- Designed RESTful auth endpoints (signup, login, refresh, protected routes) with middleware-based access control and persistent sessions backed by MongoDB Atlas.
- Engineered the React front end with protected route guards and token-refresh handling so sessions stay secure without disrupting UX.

AI Career Copilot — [GitHub Repo ↗](#)

React.js · Node.js/Python · REST APIs · LLM Integration

- Built an AI-powered career assistant that uses LLM APIs to generate personalized resume feedback, skill-gap analysis, and interview-prep guidance from user input.
- Designed prompt-driven REST endpoints connecting a React front end to an LLM backend, returning structured, context-aware responses instead of static text.
- Focused on real developer usability: fast response handling, clean state management, and a UI that adapts to the user's profile in real time.

Smart Weather Application — [GitHub Repo ↗](#)

React.js · Python · REST APIs

- Built a real-time forecasting dashboard with geolocation tracking and debounced search, integrating third-party weather APIs through a Python backend.

EXPERIENCE

AI-Assisted Full Stack Web Development Intern — Technology Business Incubator (TBI), Graphic Era University *Jun 2026 – Aug 2026*

- Built and deployed AI-powered web features inside a live incubator environment, working directly on products used by early-stage startups.
- Integrated LLM APIs into the frontend to build context-aware UI components that adapted to user behavior instead of static pages.

Head of Technical Committee — IEEE Student Branch, GEHU

- Led the technical arm of the IEEE student chapter — planned and executed workshops and coding competitions attended by 100+ students.

Campus Ambassador — Entrepreneurship Development Cell (eDC), IIT Delhi

Dec 2025 (45 days)

- Coordinated inter-collegiate technical outreach programs, growing a network of innovation-focused student developers.

CERTIFICATIONS

- [TBI-GEU — AI-Assisted Full Stack Web Development Internship, Certificate of Completion ↗](#) (ID: TBI-2026-PTQU-FZ45)
- [Deloitte — Technology Job Simulation, Certificate of Completion \(via Forage\) ↗](#)
- [eDC, IIT Delhi — Campus Ambassador Program ↗](#)

SKILLS

Languages & DSA: Java, C++, Python, DSA (200+ LeetCode problems solved)

Full-Stack: React.js, Node.js/Express.js, MongoDB, REST API Design, JWT Auth

Tools & AI: Git/GitHub, LLM API Integration (OpenAI/similar), Prompt Engineering, AI/ML Tool Integration

EDUCATION

Bachelor of Computer Applications (BCA) — Graphic Era Hill University, Bhimtal

2024 – 2027

- Cumulative GPA: 8.8 / 10.0 (through 4th semester) — focus on algorithmic complexity analysis, custom data structures, and MVC engineering.

Class 12: 75% · Class 10: 86%
